

CRISM

Canada's only
dedicated research
network for
substance misuse
interventions

BC • Prairies • Ontario • Quebec/Atlantic

...building a national and regional infrastructure for clinical, health services, and population health research in substance misuse and addictions

OBJECTIVES

Identify & develop effective clinical & community-based treatment & prevention interventions

Provide evidence to enhance treatment & prevention services among service providers & decision makers

Support efforts to improve quality of care & quality of life for Canadians

500+ PEOPLE

250+ TREATMENT & PREVENTION PROGRAMS

4 REGIONAL NODES

1 NATIONAL NETWORK

RESOURCES

NATIONAL OPIOID TRIAL:

OPTIMA

Optimizing patient centered-care

- A 6-month, open-label, multi-site pragmatic randomized trial involving over 200 clients recruited from all 4 CRISM Nodes

- Address key barriers including patient preference for tapering over long-term maintenance therapy

- Establish external validity of buprenorphine/naloxone vs. methadone in the care of prescription opioid users

MORE PROJECT HIGHLIGHTS

- Producing opioid use disorder guidelines for national dissemination and implementation
- Adapting contingency management interventions to the Canadian treatment context
- Developing online screening, self-management, and referral to treatment resource for youth
