<b>CO-APPLICANTS CO-CANDIDATS</b>	(List all investigators and their university affiliation. Additional pages may be used if required). (Énumérez tous les chercheurs et leur affiliation universitaire. On peut ajouter des pages au besoin).
---------------------------------------	--

Notes: 1) Submit original only – no copies required.  
2) No attachments except where indicated.

Nota : 1) Remettez l'original seulement – aucune copie n'est exigée.  
2) Aucune annexe, sauf aux endroits indiqués.

**PROGRESS REPORT FOR LONG TERM GRANT RECIPIENTS (5 OR MORE YEARS)  
RAPPORT D'ÉTAPE DES TITULAIRES DE SUBVENTION À LONG TERME (5 ANS OU PLUS)**

**SUMMARY OF CHANGES:**

- 1) Use this page to describe any changes in design or direction since the grant was awarded. This description may be a maximum of one (1) page.
- 2) Please attach a copy of the summary from the original application.

**RÉSUMÉ DES CHANGEMENTS :**

- 1) Utilisez cette page pour décrire tout changement de conception ou d'orientation survenu depuis que la subvention a été octroyée. La description ne doit pas dépasser une (1) page.
- 2) Veuillez joindre une copie du résumé provenant de la demande originale.

**PROGRESS REPORT FOR LONG TERM GRANT RECIPIENTS (5 OR MORE YEARS)  
RAPPORT D'ÉTAPE DES TITULAIRES DE SUBVENTION À LONG TERME (5 ANS OU PLUS)**

**PROGRESS:**

Describe the extent to which the objectives of the grant have been achieved (maximum two (2) pages).

**PROGRÈS :**

Décrivez jusqu'à quel point les objectifs de la subvention ont été atteints (deux (2) pages au maximum).

**PROGRESS REPORT FOR LONG TERM GRANT RECIPIENTS (5 OR MORE YEARS)  
RAPPORT D'ÉTAPE DES TITULAIRES DE SUBVENTION À LONG TERME (5 ANS OU PLUS)**

Empty rectangular box for the progress report content.

**PUBLICATIONS:**

List all publications, published, in press or submitted for publication, specifically resulting from the research conducted under **this grant since it was awarded two and half years ago**. Additional pages may be added. Please provide a copy of these publications.

**PUBLICATIONS :**

Énumérez toutes les publications, publiées, sous presse ou soumises pour publication, issues de la recherche menée spécifiquement grâce à **cette subvention depuis qu'elle a été accordée il y a deux ans et demi**. On peut ajouter des pages au besoin. Veuillez fournir un exemplaire de ces publications.

**PROGRESS REPORT FOR LONG TERM GRANT RECIPIENTS (5 OR MORE YEARS)  
RAPPORT D'ÉTAPE DES TITULAIRES DE SUBVENTION À LONG TERME (5 ANS OU PLUS)**

**SCIENTIFIC PRESENTATIONS:**

For each investigator on the grant, provide a list of scientific presentations specifically resulting from the research conducted under **this grant since it was awarded two and half years ago**. Additional pages may be added.

**EXPOSÉS SCIENTIFIQUES :**

Pour chaque chercheur qui bénéficie de la subvention, dressez une liste des exposés scientifiques issus de la recherche menée spécifiquement grâce à **cette subvention depuis qu'elle a été accordée il y a deux ans et demi**. On peut ajouter des pages au besoin.

**DATE :**

**Rationale.** Alberta, Saskatchewan, and Manitoba have excellent researchers investigating substance misuse (SM) interventions delivered in the clinic and the community. Each province funds treatment and prevention of SM and has developed strategic plans through their respective Ministries of Health and Regional Health Authorities. But to date, these assets have operated either in isolation, or as part of small provincial teams. This is a missed opportunity for collaboration and impact in light of three challenges shared across the Prairie provinces: (1) treatment and prevention services that serve a diverse case mix of SM clients drawn from urban and rural populations – the latter who are often highly geographically dispersed; (2) high prevalence of SM among Indigenous peoples, the fastest-growing segment of urban populations in this Canadian region; and (3) relatively limited research capacity (i.e., few faculty positions and trainees specifically allocated to SM; limited in-house capacity for SM research among service providers). The present application is submitted to address these challenges.

**Node organization.** Over 50 investigators, system and program managers, policy makers, and consumer advocates responded to the CRISM opportunity. Each recognizes the need for enhanced regional collaboration to address SM, and have committed to participate in a Prairie CRISM Node. A flexible organizational structure will allow for different levels of affiliation, collaboration, and responsibility, while providing broad reach into the research, service provider, and consumer communities. A Regional Coordinating Committee (RCC) will set strategic direction for the Node, and will be informed by a Regional Advisory Panel. Node members include investigators (academic researchers) and knowledge users (line-level service managers) who will provide additional input to RCC decisions via an annual Node meeting. Projects will involve identification of smaller subsets of members who will collaborate to use CRISM resources to execute activities of joint interest and benefit to the academic research and service/practice/consumer communities.

**Objectives and goals.** Currently, there is no network linking researchers, service providers, and consumer/patient advocates across Alberta, Saskatchewan, and Manitoba, nor have coordinated research agendas in SM interventions been articulated across the region. Viability and success of CRISM research in this Node thus critically depends on achieving our two objectives, i.e., (1) creating effective collaborative working relationships built on trust, and (2) developing regionally accessible resources that are of value to researchers, service providers, and advocates. Our long-term goals for the Node are to (1) facilitate regional uptake of evidence-based treatment and prevention interventions for SM, including polydrug misuse and related comorbidities; (2) increase regional capacity to test the efficacy and effectiveness of new treatment and prevention interventions; and (3) effectively collaborate with other CRISM Nodes and research partners on intervention trials, secondary analyses, and related research.

**Activities.** Three sets of interrelated activities will be undertaken. First, we will develop five infrastructure resources, each designed to enhance capacity for a viable regional research-practice-advocacy network. Proposed resources include knowledge mobilization tools, registries, research resources, treatment resources, and templates, most of which will be available online. Second, a regional engagement strategy will build a Prairie CRISM node as an integrated cross-provincial collaboration, using a combination of outreach to underrepresented stakeholders across our region, and training supports for graduate students. The proposed infrastructure and engagement strategy will be used to support two demonstration projects, which were developed in response to an online survey of priorities completed by Node stakeholders, an initial team meeting held in Calgary in June, 2014, and feedback provided during the proposal writing process. Project 1 will develop and test protocols to enhance motivation and client retention in substance abuse treatment in three demonstration sites (programs) across the region. Project 2 will develop and test online resources for screening, self-management, and referral to treatment for youth SM by adding a regional supplement to the Canadian

Student Alcohol, Tobacco, and Drugs Survey. The projects will generate critical initial data to inform future CRISM research, and are well-aligned with international research priorities in SM interventions.

## CRISM Prairie Node-Supported Publications (2014-2021)

### Submitted

- Kestler, A., Kaczorowski, J., Dong, K., et.al. A survey on buprenorphine practice and attitudes in 22 Canadian emergency physician groups. *CMAJ Open*.

## CRISM Prairie Node Investigator Presentations (2014-2021)

### T. Cameron Wild

#### *Presentations*

2021, February. Webinar - *Guideline activities related to COVID-19 rapid guidance program*. Host: Health Canada.

2020, Sept. Webinar - *Guideline activities related to COVID-19 rapid guidance program*. Host: Canadian Centre on Substance Use and Addiction (CCSA).

2020, May. *Urgent guideline activities related to COVID-19*. Problematic Substance Use and Harms Committee, Government of Canada. (Virtual).

2020, May. *Urgent guideline activities related to COVID-19*. Conference of Deputy Ministers, Government of Canada. (Virtual).

2019, November. *CRISM: Scoping Review of Psychosocial Interventions in the Treatment of Opioid Use Disorder*. This is Public Health. University of Alberta, Edmonton, Canada.

2019, November. *Trends in substance use among Albertan youth (2006 – 2017)*. This is Public Health. University of Alberta, Edmonton, Canada.

2019, November. *Interest in Online Supports and Brief-Self Help Interventions Among Young Adult Cannabis Users*. This is Public Health. University of Alberta, Edmonton, Canada.

2019, November. *Cannabis Norm Perceptions Among Canadian University Students*. This is Public Health. University of Alberta, Edmonton, Canada.

2019, October. *Psychosocial interventions for opioid use disorder: A scoping review*. Canadian Society of Addiction Medicine, Halifax, Nova Canada.

2019, November. *Psychosocial interventions in the treatment of opioid use disorder: A scoping review*. Issues of Substance conference, Ottawa, Canada.

2019, November. *CRISM: Emerging Health Threat Implementation Science Program on Opioid Interventions and Services*. Addiction Day. Edmonton, Canada.

2019, October. *Psychosocial interventions for opioid use disorder: A scoping review*. Canadian Society of Addiction Medicine, Halifax, Nova Canada.

2019, October. *Trends in e-cigarette use among Albertan youth (2014-2017)*. Tobacco and Youth Vaping Stakeholder Engagement Workshop Edmonton, Canada.

2019, October. *CRISM opioid implementation science program*. Canadian Society of Addiction Medicine, Halifax, Canada.

2019, June. *Trends in substance use among Albertan youth (2006 – 2017)*. Addiction Day. Edmonton, Canada.

2019, June. *Psychosocial interventions for opioid use disorder: A scoping review*. Addiction Day. Edmonton, Canada.

2019, May. *Prevalence and correlates of support for harm reduction in a population survey of Canadian adults*. 13<sup>th</sup> meeting of the International Society for the Study of Drug Policy, Paris.

2019, May. *Pre-implementation of a multi-center, Phase IV, Investigator initiated clinical trial: Experiences from the Canadian Research Initiative in Substance Misuse*. 40<sup>th</sup> annual meeting of the Society for Clinical Trials, New Orleans.

2019, April. *Psychosocial interventions for opioid use disorders: A scoping review*. Canadian Association of Drugs and Technologies in Health annual meeting, Edmonton.

2019, April. University of Alberta Chancellor's Opioid Forum, Edmonton, Canada
